

Emergency Casualty Care™

for Law Enforcement and Corrections Officers

Rally Point Training Consulting's Emergency Casualty Care™ (ECC) course brings our officer survival and training tenets to life for Law Enforcement and Corrections officers with hands on and classroom based training in emergency casualty care to include:

- Officers Down in the Line of Duty
- Locating, Identifying and Treating Life Threatening Bleeding
- Zones of Care
- Tourniquet Application
- Wound Packing
- Pressure Dressing Application
- Psychological v. Physiological Incapacitation
- Ballistic Confidence
- and more...

This course teaches officers how to recognize and respond to major trauma that they or their partners may suffer while on duty and how to treat a variety of wounds using basic trauma supplies including tourniquets, hemostatic gauze and trauma dressings. Using our training tenets and memory encoding techniques, we focus not only on teaching how it is done, but on truly building the officers' skills and confidence so they can automatically respond to major trauma with little to no conscious thought to stop the bleeding as quickly and easily as possible and get back in the fight.

All participants will receive a North American Rescue Bleeding Control Training Kit (a \$47.66 value) including:

- 1 – Combat Application Tourniquet (C-A-T) Blue Training TQ
- 1 – 4 inch Responder Emergency Trauma Dressing (ETD)
- 1 – Combat Gauze Trainer
- 1 pair – Responder Nitrile Gloves

See Required Gear List and Important Notice regarding this course at www.RallyPointTraining.com

Attendees who do not bring required gear and comply with Important Notice will not be allowed to participate in training
